# GALERIE TAMÉNAGA

THREE GENERATIONS OF ART LOVERS:  
KIYOSHI TAMENAGA (LEFT) WITH  
KIYOMARU AND KIYOSTUGU.

Galerie Taménaga was established by Kiyoshi Tamenaga, 50 years ago in Ginza Tokyo. They first opened in 1969 as the only Japanese art dealer of Western masters in Japan. It was at a time when access to Western artworks was limited to a few museum collections. By building strong relationships in France since the 1950s with some of the luminaries in the French art world, such as the painters Bernard Buffet and Fougjita Tsuguharu, as well as some distinguished collectors, he was able to bring artworks out of France despite the strict art protection policy.

Tamenaga devoted himself to artworks by artists of “École de Paris” who were hardly known in Japan at the time. However, in addition to collecting already established artists, his passion has also been to discover

and nurture talented artists. Henceforth, two years after the opening of his first Galerie, he opened his second one in Paris, where he worked with new artists who are now among the firmly established concrete painters.

Throughout the last half-century, Tamenaga has expanded its scope beyond the French and Japanese art world.

In recent years, they have made efforts to discover and nurture fresh talents in European countries other than in France as well as in the United States and Asia.

Since the mission of Tamenaga is to bridge Japan with the rest of the world, and Niseko is now a multicultural hub where people from all corners of the world come to spend their winter, Tamenaga believes that here lies the perfect opportunity to

showcase the artists and demonstrate the rare exchanges of culture within Japan.

Living with art is an extraordinary experience, and collecting art is a passion that will last for a lifetime, bring great pleasure and enrich life. Tamenaga will aid to create harmony between the beautiful nature, architecture, interior and arts for the home away from home in Niseko.

Tamenaga will present the contemporary fine artists from Spain, China and Japan that will bring a different new aspect to Niseko. Each artist demonstrates unique visual experiences, and their stunning artworks propose an introduction to their remarkable scope of the world. The exhibition will take place in Hirafu 188 from the 18th of December until the 25th.
